

Heat controller for sampling probes

EmiTest THERMO

Description

EmiTest *Thermo* is a field proof instrument designed to manage heating of sampling lines elements.

Its main features are:

- Compatible with all CDL-Tecora heated elements: heated probes, filter boxes, heated lines...
- From 2 to 4 Channels,
- Configurable Setpoint temperature (range dependent on heated element capacities - recommended 50 to 250°C),
- Thermocouple K temperature sensor,
- Resistant and tightened casing,
- Large choice of cable lengths.

EmiTest *Thermo* – 2 lines version

EmiTest *Thermo* references

Number of ways	220V	110V
2	ES003-0002	ES003-0012
3	ES003-0003	ES003-0013
4	ES003-0004	ES003-0014

Cables references

Cables length	Reference
4m	ES099-0004
10m	ES003-0010
25m	ES003-0025

*Other lengths available on request

Technical characteristics

General specifications

Number of lines	2 to 4
Heat control range	Recommended 50-250°C
Temperature sensors	K type thermocouple
Ambient working conditions	0 to 50 °C - 95%RH
Power supply	220 Vac 50/60Hz - (110Vac 50/60Hz)
Weight	Estimated 3kg (depends of ways number)

Technical specifications may change without previous warning
